PROFESSIONAL SUMMARY

Full-Stack Developer specializing in AI training infrastructure with 2+ years as a Data Annotator on Outlier, OneForma, and Welo Data. Building Annotrix, an MVP training platform for onboarding AI annotators using React, Node.js, and PostgreSQL/Supabase. Proven expertise in RESTful API design, relational database architecture, and responsive frontend development. Dual competency in scalable backend systems and intuitive user interfaces. Seeking frontend, backend, or full-stack roles within AI/ML data infrastructure teams.

AI TRAINING & DATA SPECIALIZATION

- AI Training Data Specialist with 2+ years experience on Outlier, OneForma, and Welo Data platforms, completing 1000+ annotation tasks across computer vision and NLP projects with 95%+ accuracy ratings
- Deep expertise in annotation guidelines, edge case identification, and quality assurance protocols for machine learning datasets
- Built Annotrix: Full-stack annotation training platform (React, Node.js, PostgreSQL/Supabase) designed to onboard and qualify data labelers through rule-based assessments
- Subject Matter Expert in educational content and information systems, enabling accurate domain-specific data labeling and metadata management

TECHNICAL SKILLS

FRONTEND DEVELOPMENT: React.js, Next.js, JavaScript (ES6+), JSX, HTML5, CSS3, Tailwind CSS, Responsive/Mobile-First Design, Component Architecture, React Hooks, Context API, Figma-to-Code Implementation

BACKEND DEVELOPMENT: Node.js, Express.js, RESTful API Design, PostgreSQL (Supabase), MongoDB (Mongoose), Database Schema Design, JWT Authentication, Middleware Development, Row-Level Security (RLS), Data Validation

AI & DATA INFRASTRUCTURE:AI Training Data Annotation, Data Validation & Quality Assurance, Metadata Management, JSON Data Processing, Annotation Platform Workflows, ML Dataset Preparation, Data Pipeline Design

TOOLS & PLATFORMS: Git, GitHub, Postman, Chrome DevTools, NPM/Yarn, Supabase, Vercel, Netlify, Heroku, Outlier, OneForma, Welo Data

PROJECTS

ANNOTRIX- AI Annotation Training Platform (MVP) | React, Node.js, Express, PostgreSQL (Supabase), Tailwind CSS

Full-stack qualification platform for AI data annotators

- Architected responsive React application with role-based authentication (Admin/Trainee) using JWT and Supabase Row-Level Security

- Designed PostgreSQL relational schema with 4 core tables (users, questions, attempts, responses) with foreign key constraints and data integrity rules
- Built RESTful API with Node.js/Express handling question management, image uploads, exam attempts, and pass/fail qualification logic
- Developed Admin Dashboard for creating training questions with image assets, documenting platform rules (Outlier/OneForma/Welo standards), and monitoring trainee qualification status
- Implemented Trainee Portal with timed assessments, attempt tracking, and immediate pass/fail feedback based on configurable thresholds
- Integrated Supabase Storage for image handling in questions, simulating real annotation scenarios (bounding box preparation, categorization tasks)

LEARNING MANAGEMENT SYSTEM (LMS)

React, Node.js, Express, MongoDB, Tailwind CSS, JWT | Full-stack ed-tech platform with role-based access

- Engineered three responsive dashboards (Admin, Instructor, Student) using React and Tailwind CSS, implementing mobile-first design across 15+ screen sizes
- Designed MongoDB schemas with Mongoose for users, courses, enrollments, and content collections, managing 15+ document relationships
- Built RESTful API with 25+ endpoints handling authentication, CRUD operations, and role-based authorization using JWT middleware
- Developed reusable React component library including modals, forms, and protected route logic with Context API state management
- Implemented course enrollment flows, content upload interfaces, and progress tracking systems

TAX CALCULATION WEB INTERFACE

React, JavaScript, Tailwind CSS | Financial data processing frontend with backend integration planned

- Developed responsive React interface with dynamic form validation and real-time error handling for tax input workflows
- Built modular component architecture for financial data collection and results presentation
- Architected client-side calculation logic with scaffolding for Node.js/Express backend integration
- Designed API contract specifications for future backend computation engine and database connectivity

PROFESSIONAL EXPERIENCE

AI Training Data Specialist

Outlier, OneForma, Welo Data | 2023 - Present | Remote | Contract

- Completed 1000+ annotation tasks across computer vision and NLP projects, maintaining 95%+ accuracy ratings and meeting strict quality standards
- Specialized in educational content labeling, document transcription, and domain-specific data categorization requiring attention to nuanced guidelines
- Developed deep understanding of annotation edge cases, consistency protocols, and inter-annotator agreement standards
- Consistently met tight deadlines for high-volume data labeling campaigns while maintaining precision

- Gained insider perspective on annotator onboarding gaps, directly informing the design of Annotrix training platform

Information Digitization Assistant

Kwara State University Library

- Managed digitization and upload of 500+ academic documents to online databases, ensuring metadata accuracy and standardized file structures
- Designed metadata schemas and validation protocols, achieving 99% data accuracy for digital repository systems
- Developed automated JavaScript scripts to streamline repetitive data processing tasks, reducing manual workload by 40%
- Collaborated with technical and non-technical stakeholders to define data structure requirements for database systems
- Applied strict data governance standards for academic records, directly transferable to AI training data quality assurance

Data Entry & Assistant

Rollar Cecilee Communication

- Validated and sanitized datasets of 1000+ records, ensuring consistency for digital workflow systems
- Implemented structured data templates that improved record-keeping accuracy by 35%
- Supported digital transformation initiatives and cross-functional team coordination

EDUCATION

Bachelor of Library and Information Science (BLIS)

Kwara State University, Malete | 2020 - 2023

National Diploma (ND)

Kwara State Polytechnic, Ilorin | 2017 - 2019

CERTIFICATIONS

- JavaScript Application Programming | Cisco Networking Academy | 2024
- JavaScript Application programming | Saylor Academy
- JavaScript Programming | Alison
- Customer Relationship Management | HP LIFE Foundation | 2024
